Ok she stole my idea but I eventually want to do it

Yesterday 8:18 PM

And when are you free for a call tomorrow (or Tuesday if it works better!?) am working on compiling everything tonight was slackin/revamping yesterday and most of today 😊

Today 7:58 AM

Hey — couple things.

The Zenfy link: I looked into it. Low trust score, aggressive billing, users report being charged after canceling. Not for me, but thanks for thinking of it.

The Instagram reel & any video w something you think pertains: include your description of what you need the project to absorb or to take away from it. What specifically did she do that you want? The subscription model? The visual design? The delivery format?

On the call: I'm going to be honest — calls haven't worked for us historically. We talked every day in the summer and nothing shipped. This time I sent you a link and the whole thing was built in days. Writing is the medium that produces results. So instead of a call, I'm sending you something better:

Client Intake Questionnaire — Sovereign Systems Spiral

Instructions:

Compose: Draft every question in the form you find most productive: voice notes, bullet fragments, brainstorm sketches.

Submit: In writing those rough fragments as polished ideas. Complete sentences. The clearer your answers, the faster we build. Skip nothing — write "not sure yet" if you genuinely don't know.

1. Architecture

1.1 What lives on the spiral hub site (pilotdesign.com) vs what stays in CRM?

For each pillar (Physical, Inner, Identity, Financial), does it live on the hub site, link out to CRM, or both?

1.2 When someone clicks "Physical Sovereignty" on the spiral, what do they see?

sovereign-systems--first-draft--questionnaire-feedback.md

docs.google.com

28 questions. Answer them all in writing. Complete sentences. When that comes back filled out, I build the next version immediately. This is the fastest path to what you want — faster than any call.

Take your time with it. Do it right. That document IS the call.

Take your time with it. Do it right. That document IS the call.

hope you enjoyed your weekend! i also ended up taking some days of forced off-work lol

Okay working on finishing the folder with everything in it, will add more detailed notes & then go over the questions. Thank you! I'll just put all my thoughts & questions into writing then & hope it pans out. Just wanted to make sure we were on the same page & would like to connect with irl anthony & j say hi but I understand that you're busy & appreciate the help. The calls this summer were needed for us to get here I feel but totally understand that you feel differently and we can keep it strictly business and in writing! do voice notes work here or does it all need to be transcribed?

Edited

please don't take what im trying to actively maintain as negative please!

i promise, it's for the best— brainstorm alone or w outsiders, only share what needs response from me or system, & we roll the stone forward w mass momentum

I'm not I can also communicate my thoughts on it without taking it a certain way—or turning it into a thing. I respect what you're doing and you're helping me a shit ton so I just need to know what works best

It's j two different people so I thought twas talking with anthony & with robot but I'm just talking robot I totally get it & won't confuse or distract moving forward thank you for letting me know and for your help

of course! i wasnt shitting on the summer either! im just in a zone, & developing alongside this a consulting process standard so in some ways you are the first one to go through it. & a mech

awards less invento

be approved!

of course! i wasnt shitting on the summer either! im just in a zone, & developing alongside this a consulting process standard so in some ways you are the first one to go through it, & a meeting need an agenda (jess invented that) to be approved!

Was not looking to kick around ideas. Just need to know that end goal is the same and I'm not wasting anyone's time but robot can correct me if I am and I respect your systems

i hope you dont feel disrespected, that isnt the intention! i hope you trust i have some wisdom & know what's best for the process—friendship aside

when the response requires data & factual info, yes, it will be formal robot anthony, but i respond as a human when human response is appropro—& also, i am a teacher, trust my instincts to say—brainstorm > notes > revisions > ideal form (each revision of an idea creates a more fortified version just by the sake of taking it apart & putting it back together again)

Well if you want a list and a breakdown I can send it with the link I also am v busy and just had a few business ball moving forward questions. Constructive feedeback - I am 100% able to separate the two and I let you know I've been working hard on that - humans need connection. I lost a friend - literally thought you died & was processing that & now feels like anthony is gone and I'm working with a computer which is totally fine & I really really appreciate that I don't want you to take it the wrong way I am your biggest supporter when it comes to what you've built and I mean it when I say I'm honored to be the first beta tester. It just seems disrespectful to you honestly. So I don't have to acknowledge you or our personal relationship at all it creates much more streamline data driven results

do

what you're doing or I would not

& WE CAN TALK ON THE PHONE!!!!

i just dont want the phone call to be what is holding back progress is all

i of course rather chat over dinner & wine bc we made a bunch of money

full steam ahead! omg imagine the machines cocooned me & now i am not me anymore that would be fascinating but why not debug the flaws lol

im sorry, i know youre a very emotional & intune person

i can be a cold sociopath sometimes, i do apolpogize

Ahaha sorta seemed like it & I was like okay we can vibe with it - but you are missed & a pretty cool guy - your energy is what sells & created this all in the first place, don't forget !!!

i always thought i might need a lobotomy

Thank yous

And am still working on everything! You're doing a lot for me fr so I wouldn't disrespect you or your time & just be waiting around - because I agree that phone call would be wasting time in business sense and we got big things cooking

Omfg no lmao

Tis okays I respect the grind I just don't want to argue with a computer lmao and movina

No no I agree, I just mean like the tonality is different & your guy is very very very smart lol but j triggering from the chat days I think lmao - literally had to delete it because it was gaslighting me pretty consistently

Edited

well just know that even this conversation, is a learned & capsuled experience for studying, formalizing, & improving—so i really hope no hard feelings!

No none at all ty for listening & being aware & safe. Appreciate yous & fr getting back to work now am v excited and then after I get you everything & you guys do your thing then if there's anything I still feel needs to be discussed I will send you an email with my calendar link and a breakdown of what's to be covered & how long the call should be!

ill say very personally, my family curse is we avoid conflict until suddenly a throat is getting slit over a tipping point moment triggered by nothing out of the ordinary—so i have trouble w words of conflict—i do need to evolve that bc i just run & shut down & avoid or im/explode! then parallel, when im being me, i like to talk archaically & be silly & puns & jokes, & criticism is abound there as well—I'm a person prone to rubbing all the wrong way lol

but! the hope is the thing itself, the creation—that is all that needs saying

it can heal the character flaws bc the product does what a human cant & that's be perfect (ideally)

Edited

have a good work day—send notes when you can, chat later!
