

Sorry shaha just for real would spend forever with you on making each lil universe justlll right and would want to try all the colors etc shaha, but i am sure im posting and posting the water stuff before i can completey unleash the creative cause then ik ill just get to spend all the time creating cause the money will be flowing

Thursday 2:17 PM

Hello Kind of sad question/not side quest but if you have time/capacity today and if I could add you as a virtual assistant to my GHL account, Kyle posted, he started posting water reels on me for TikTok and he has Like the last one he posted has like 200 likes and so it's got like 80 people to my water... >

On me for TikTok 🤪 🤪 🤪 brain is still waking up lolol

Gots it!!

Thursday 5:41 PM

Yesterday 12:17 AM

Okay okay old one was stopdrinkingacid.com/waterhub & new one is stopdrinkingacid.com & got the quiz all done just have to put the coding in for the branches and then connect the auto and put in a few more emails and the two lil docs and it's all done !! 🤔😓🤔💰💣

Today 11:03 AM

Is there anyway for me to pull all the branches you made/info resources etc into GHL? Cause it's really amazing and I'd love to use it so it doesn't get lost, but if not that's okay too we can just repurpose it on the spiral site a lil so it's not redundant (cause I don't want all of it on the spiral I don't think, just a few parts)

hey! gm

Essentially I want to switch my baby branches to the spiral and your kickass ones into GHL if that's okay with you?

3 Replies

Hi!!

i will get u an answer for that in a moment!

Branches
Switch baby branches to spiral / awesome branches to GHL?
Yes; spiral for SEO snippets, GHL for gated deep content.

Import all branches/resources into GHL?
Yes; manual copy, HTML export, or future sync.

Overall status?
Most features live; key decision is branch content split.

Versions
Revisit initial versions and make live?
Yes; use /timeline to preview and activate versions.

Launch an earlier version this week for templates?
Yes; node templates (1-13) are already live.

Water Page
Launch a previous version to start using the water page?
Yes; water flow works independently of spiral nodes

Start using water page immediately?
Yes; water page and capture form are already live

Switch baby branches to spiral / awesome branches to GHL?

Yes: spiral for SEO snippets, GHL for gated deep content.

Import all branches/resources into GHL?

Yes; manual copy, HTML export, or future sync.

☐

Yes — and the technical work is straightforward, but worth framing the tradeoff before we commit.

Essentially I want to switch my baby branches to the spiral and your kickass ones into GHL if that's okay with you?

three quick question clarifiers:

- | | | |
|---|---|--|
| <p>1. Of the 6 branches currently on the spiral (gut-hormones / the GHG side).</p> <p>2. How many of YOUR GHG "baby branches" should land on the GHG side?</p> <p>3. Easiest format for me to send the studio branches to you for conversion?</p> | <p>rich blocks. Moving them to GHG means converting markdown → GHG's CMS format (likely WYSIWYG paste with some manual reformatting; GHG doesn't import markdown natively). Your "baby branches" on the spiral side become content the site OWNS.</p> | <p>ich 2-3 do you want to KEEP visible? I'll move the rest over to the GHG side.</p> <p>ure out the slugs.</p> <p>anest into GHG on your side.</p> |
|---|---|--|

Edited

The "kickass branches" currently live in `src/content/branches/*.md` (gut-hormones, fertility, athletic, autoimmune, cancer-support, sustainability) with Astro frontmatter + Markdown rich blocks. Moving them to GHL means converting markdown → GHL's CMS format (likely WYSIWYG paste with some manual reformatting; GHL doesn't import markdown natively). Your "baby branches" on the spiral side become content the site OWNS.

The thing to decide: are these branches lead-magnet content (belongs in GHL where the nurture sequence handles conversion) or trust-building public content (belongs on the spiral site where SEO + new visitors land)? Probably some of each. Recommend: short SEO-tuned versions on the spiral, full-depth versions gated in GHL after email capture. Same content can live in both, framed differently.

2. "Is there anyway for me to pull all the branches you made/info resources etc into GH?"

Yes — three options — fastest to most polished:

This is so badass!!!

And I loveee this but haven't had time to look yet!

I tried to click and take out the anesoa and it tried to send you an email, is that preferred?

I don't want to lose anything you've built I love the branches like the fertility stuff I just don't want to confuse or be sending the user back and forth between sites so I think the light touch of with the water reports and such is perfect for the spiral and then we can move everything else water related into GHL

HTML !

Sorry this was for q3. lol 🙄 but do I need to send you some!?

1. Let's do inflammation, hormone health & energy/cellular health!!

app.gohighlevel.com

Essentially I want to switch my baby branches to the spiral and your kickass ones into GH

3 Replies

2. They're sad right now lol but sent / explained in voice note!!

you can screenshot it or copy paste whatever is easiest for uuu

no worries!

the answers however is smoothest for u i compile & implement!

Oh gotcha from the site sorry was confusing myself lol - all filter stuff after quiz & bottled water cost breakdown, can be disabled right now (the specific filter info and names - I don't want to lose it but let's get everything else straightened first and then can send you more on that later cause is gonna be trickier to set up I think!
