Ahhhh omg I feel im so bad at filming but ik im just a perfectionist

So it took me ALL day to finish but I finally did it 🥹🥹

Omg I want that!!

Today 10:54 AM

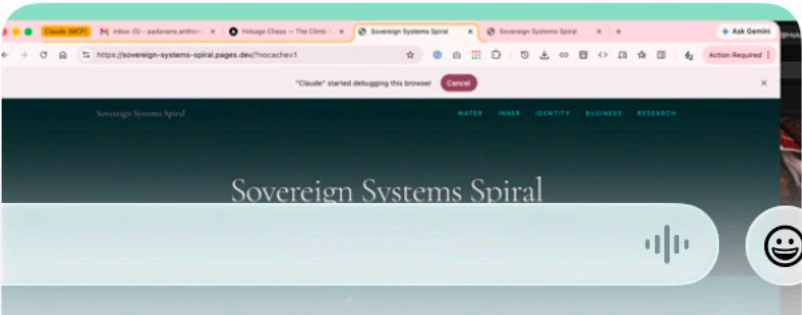

Sovereign Systems Spiral

sovereign-systems-spiral.pages.dev

oh goodness lol

Round 3 is live now (02c90a2..845fc9f pushed). Let's move on to the new direction.

I've quickly read your pushback. My "all 5-point stars" approach was essentially a homogenizing version of Maddie's "asterisks or stars" — I chose one star and repeated it 13 times. You're sugge... >

orrr:

make generative star structures that
each one is always unique and they each have different
physics and so forth?

CONTAMINANTS FOUND	EXCEED HEALTH GUIDELINES	EXCEED LEGAL LIMITS
--------------------	--------------------------	---------------------

Haloacetic acids (HAAs)	277× above health guideline	
Total trihalomethanes (TTHMs)	164× above health guideline	
Chromium (hexavalent)	42× above health guideline	
Chloroform	28× above health guideline	
Nitrate	13× above health guideline	

WHAT YOU'RE SPENDING ON WATER

Store brand

Want to see which filter removes *your* specific contaminants?

See My Filter Recommendations →

REALITY CHECK

Standard Brita filters reduce chlorine taste and some sediment — but they don't remove HAAs, TTHMs, hexavalent chromium, PFAS, fluoride, or most of the contaminants flagged in your area. Fluoride removal is one of the most common concerns, and most basic filters miss it entirely. Reverse osmosis strips minerals your body needs. There are better options.

IM SO OBSESSED !!!!

Omfg can't say thank you enough

Wow

i really like it too!

food for thought!

I love this! They don't necessarily have to be 3D unless that's okay! But maybe can we switch the cross and the heart for something a little less generic (idk the right way to say it lol) more traditional/stoic maybe ahaha idkkk but we really don't have to get crazy with it if it's too hard we could even just do little glowing orbs with the sparkles around it and then the name pop up on the hover in the middle too sounds cute! But I think it's cute right now too lol j happy with it

I do like the chakra colors and how they are right now! Maybe just add in another shade of orange instead of three purple and then we can make the most top purple a little lighter!?

Is this what I'm seeing now? Or you're saying like real stars they're all different a little - cause if that's what you're saying then YES lol could even just do the color so they're orb like but stars and then word pops up in center or under on hover !?! Is that what you're saying !?!?!

And i absolutely love the each symbol being from a different religion - chefs kiss !!!

Omg okay I think you read my brain !!! If I understand correctly, you think the actual star like structures being each node instead of each one being a different glyph or symbol yeah?! Cause I'm down with that or we can do in steps too if needed but am obsessed with that idea WOW

Need to broaden my vocabulary cause cannot put into words lolol

They both sound so cool but I've been obsessed with stars lately and how they're all different but essentially just look like refracted light on water 🥰🥰🥰

So like fr read my brain from next week could cry so happy lol 🥹🥹🥹🥹🥹🥹🥹

And just the friggen filter page 🥹🥹🥹🥹🥹🥹 I LOVE LOVE LOVE IT. Fr will get the links and we can come up with process here in the next few days that works and then can use that as a CTA/ freebie for my posts to get people in (THE BEST ONE EVER OMFG JUST SO MUCH USE & they can see it all asap it's going to convert so so well UGH you're the BEST thank you thank you thank you) & learning about the water / buying filters and ionizers out the wazooooo !!!!!

And finishing the business side / DP today and it's so fuckin locked in 🍷🍷🍷 and then will just have fun building / creating the water branches in GHL and adding to the spiral (if I can) or making my notes there & then we're fr fr in the moneyyyyyyy

& then house & horses & garden no biggie 🐾🥳🥳🥳🥳🥳🥳

🌙 Maddie has notifications silenced

i really like it too!

food for thought!
